Florence's Drinking Water Unaffected by Coronavirus

The City of Florence Water Department would like our customers to know that the health and safety of our staff and customers is our top priority. We are committed to providing safe and reliable drinking water to your tap. Our advanced water treatment and hypochlorite (chlorine) disinfection process eliminates pathogenic organisms (which include viruses). This ensures that COVID-19 (the coronavirus) cannot be transmitted through our drinking water. While it's always advisable to stock bottled water at home in case of emergencies, **The City of Florence does not expect this health outbreak to disrupt service to our customers.** As always, your tap water is available, plentiful and safe.

The following links to the CDC and EPA websites will provide additional information regarding municipal water supplies, public pools and other various health and water related situations.
